

I claim:

1. A portable insulated pack for storing food and drinks in a cooled environment, the pack comprising:

- 5 (a) a molded, generally closed plastic container having a top and bottom and surrounding sides to define a water-tight surrounded space to hold cooling liquid,
- the upper portion of the container being provided with an access opening to said surrounded space,
 - a first side of the container being formed with at least one substantially
 - 10 closed-form food pocket defined by a closed back and closed sides extending laterally from the back of the pocket to a front access opening established generally coincident with the first side of the container,
 - a second side of the container being further formed with at least one substantially closed-form drink package-sized pocket defined by a closed back
 - 15 and closed sides extending laterally from the back of the pocket to a front access opening established generally coincident with the second side of the container,
- (b) a cap releasably secured to the opening in the upper portion of the container, the cap having a removable lid for drinking liquid from the container,
- (c) an insulated jacket sized for a snug fit around the container, the jacket having:
- 20 - an opening in the upper portion through which said cap extends,
 - a closable access opening through which the container is installable into and removable therefrom,

- closable access openings aligned with the front access openings of the food and drink pockets, and

(d) a carry strap secured in fixed relation to the jacket.

5 2. The pack as defined in claim 1 in which the sides of the drink package-sized pocket incline upwardly upon progressing from the closed back to the open front thereof.

3. The pack as defined in claim 1 in which the drink package-sized pocket intersects a side of the container adjacent the front access opening thereof.

10

4. The pack as defined in claim 1 in which the drink package-sized pocket is generally cylindrical.

5. The pack as defined in claim 1 in which the drink package-sized pocket is
15 generally rectangular.

6. The pack as defined in claim 1 in which the food pocket is generally rectangular.
